DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it has not been presented on a separate sheet in the application. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-3 and 10-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pritchard USP 5,547069 in view of Steadman USP 4,589,542.

Pritchard teaches the claimed invention as outlined on the attached marked up drawing figure 4 of Pritchard. Pritchard fails to teach how his three motors are controlled or operated. Steadman teaches a conveyor apparatus (roller assembly) which utilizes limit switches/sensors 32, 33, 34 along with a central electronic controller as outlined in drawing figures 4-6 and specification column 4 of Steadman. It would have been obvious to utilize the controller/sensors configuration of Steadman on the device of Pritchard, since Pritchard is silent on his control and he inherently would have some type of control operating his three motors, therefore control system as set out by Steadman would fulfill this void in the Pritchard device. Electronic controllers and motor systems are well known and the generic claiming of such a system in the

Application/Control Number: 10/555,093 Page 3

Art Unit: 3651

applicant's device does not provide a patentable departure over the device of Pritchard in view of Steadman.

RE claims 3 (type of motor), claims 21, 22, 24 (type of sensors), claims 43, 44 (size of components, claims 12-20, 36-38 (how the controller functions), and claim 47 (internal/external links to controller), all of these features are mere design features of the particular invention at hand and the claiming of any of these particular well known variations does not provide a patentable departure over the device of Pritchard in view of Steadman. Some design considerations which would affect the above features may include: the environment in which the PDU is utilized (indoor/outdoor), the weight of the cargo being handled, how intricate the control system needs to be for the intended purpose.

Allowable Subject Matter

4. Claims 4-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Douglas A. Hess whose telephone number is 571-272-6915. The

examiner can normally be reached on M-Thurs 5:30 - 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Gene Crawford can be reached on 571-272-6911. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

7. Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status information for

unpublished applications is available through Private PAIR only. For more information about

the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the

Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

If you would like assistance from a USPTO Customer Service Representative or access to the

automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
